

Connect to Library Resources from Off Campus

Certain resources like article databases and electronic books require users to be members of the Champlain community. To use these resources when you are at home, you must be authenticated as a Champlain user. Start by accessing resources through the library website at <http://cosmos.champlain.edu/library>. Search the [Library Catalog](#) to find an e-book or choose a database from our [All Databases \(Alphabetical\)](#) page. Then,

1. Select the link to the database or e-book you would like to use;
2. A window will open asking for a user name and password;
3. Use the same login you would use to log in to My.Champlain;
4. The resource will automatically load;
5. You will be able to use any other database or e-book during that session without having to login again.

If you run into access problems, contact the Help Desk at 802-860-2710 or by email to helpdesk@champlain.edu.
